

Tushar Gangwal

Engineering Manager

mail@tushar.info | +91-9462547055 | Bengaluru, India | linkedin.com/in/tushargangwal | github.com/tushargangwal | tushar.info

PROFESSIONAL SUMMARY

Engineering Manager who leads through influence and enablement - building teams that own their outcomes and ship with confidence. 12+ years spanning full-stack development, distributed systems, infrastructure, and people management, including co-founding a venture that scaled to 1,200+ schools and 350,000+ students. Proven track record of driving technical excellence, Agile delivery, and data-driven product decisions across distributed teams. Experienced in Engineering Leadership, People Management, Scrum, Release Management, and Product Strategy. Role-relevant focus areas include maritime SaaS, cloud-hosted enterprise systems, uptime, reliability, code reviews, SDLC, KPI-based delivery, and product-engineering alignment.

TECHNICAL SKILLS

Languages	JavaScript (Node.js), Python, PHP, Ruby, Perl, C/C++, Shell, HTML/CSS
Frameworks	React.js, Next.js, Express, Feathers.js, Slim PHP, AngularJS, BackboneJS
Databases	PostgreSQL, MongoDB, Elasticsearch, Redis, MySQL, SQLite, Cassandra
Cloud & Infra	AWS, Azure, GCP, DigitalOcean, Docker, Kubernetes, GitHub Actions, Pulumi
Management	Engineering Management, People Management, Scrum Master, Release Management
Concepts	System Design, Distributed Systems, Microservices, Event-Driven Architecture, API Design, High Traffic Optimisation, Asynchronous Queuing, Feature Flags
AI & Automation	MCP Integrations, Specification-Driven Development, Agent Harness Design, LangGraph

PROFESSIONAL EXPERIENCE

Engineering Manager - Refrens

Nov 2021 - Apr 2026 | Bengaluru, India

AI-powered Accounting & ERP trusted by 150,000+ businesses

- Led and managed 4 cross-functional engineering teams with 18 engineers across Bengaluru, Surat, and remote locations, establishing async-first collaboration norms, monthly 1:1s, performance reviews, and growth plans.
- Collaborated with CEO/CTO to research, architect, and implement strategic technical solutions across a platform serving 150,000+ businesses; owned sprint planning, backlog grooming, and business-impact prioritization.
- Acted as Release Manager, enforcing code review standards, managing hotfix pipelines, overseeing containerized deployments across AWS and Azure, and reducing release cycle from about 2 days to same-day via QAOps automation.
- Improved production reliability and reduced critical database query latency by 60% through monitoring, query analysis, and targeted refactoring, contributing to near-zero downtime SLAs.
- Led adoption of AI-driven engineering workflows including MCP integrations, Specification-Driven Development, and autonomous agent harness design, cutting scoping overhead by about 30%.
- Architected bookkeeping, financial workflows, third-party integrations, analytics, experimentation, and workflow automation across 5+ product verticals.

Founder & CTO - Nested Pointer Technologies

Sep 2016 - Oct 2021 | Jaipur, India

- Founded and scaled a 9-person engineering organization, owning product strategy, technical architecture, end-to-end platform operations, code review culture, Git workflows, and CI/CD practices.
- Scaled a cloud-based school ERP platform to 1,200+ institutions across 3 states, serving 250,000+ students.
- Architected hybrid cloud and on-premise deployment via VMs over VPN, with secure distributed operations for single and multi-branch organizations.
- Built a full-stack SMB accounting platform using Node.js, Next.js, PHP, MongoDB, and BackboneJS with GST, inventory, payroll, and reporting workflows.

Associate Technology Architect - Secure Learning Pvt. Ltd.

Feb 2016 - Aug 2016 | Udaipur, India

- Designed and developed a full-stack school SaaS platform using Node.js, StrongloopJS, MongoDB, and AngularJS with clean REST API communication and Git-based DevOps practices.

Senior Software Engineer - Wipro

Aug 2015 - Jan 2016 | Jaipur, India

- Integrated ArcGIS APIs using Node.js and Express, building RESTful geospatial data services and GIS frontend components for map-based retrieval and analytics.

Lead Developer - Pcube IT Services

Dec 2014 - Jul 2015 | Jaipur, India

- Led full-stack development across PHP, Node.js, and AngularJS; managed Linux server environments with OpenVPN and IPTables; worked with MongoDB and Cassandra for high-volume workloads.

EDUCATION

Bachelor of Technology in Computer Science, Institute of Engineering and Technology, Alwar - Rajasthan Technical University, Kota | 2006 - 2010

CERTIFICATIONS & ACHIEVEMENTS

GATE (Computer Science & Engineering) - Qualified three consecutive years (2011-2013); conducted by IIT Delhi / MHRD.

LANGUAGES

English (Professional proficiency) | Hindi (Native)
